

February 20, 2015

Keith A. Maggert, PhD
Cellular & Molecular Medicine

Dear Dr. Maggert:

The Institutional Biosafety Committee (IBC) at its February 18, 2015 meeting, considered your Biosafety Level 1 application to use recombinant and/or biohazardous materials as follows:

Protocol Title: Investigation of Genomic Instabilities in *Drosophila*
Agent: *Drosophila melanogaster* whole organisms and *drosophila* cell culture
Cancer Center (B/222): R/4917, 4918
This protocol falls under the NIH Guideline section III-F-4.

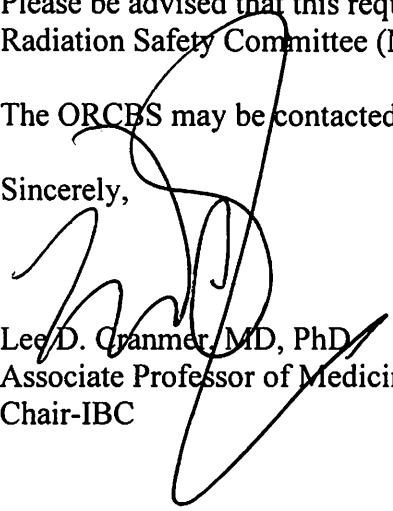

The Committee granted full approval without dissent.

The Office of Radiation, Chemical & Biological Safety (ORCBS) will be contacting you to schedule an initial visit and a New Approval Holder Orientation (NAHO) to go over the responsibilities involved with your new approval, if they have not done so already. Your new approval number is 11066.

Please be advised that this request may require approval from other committees i.e. the Medical Radiation Safety Committee (MRSC), Institutional Animal Care and Use Committee (IACUC), etc.

The ORCBS may be contacted with any questions or if you require additional clarification.

Sincerely,

Lee D. Cranmer, MD, PhD
Associate Professor of Medicine
Chair-IBC
